

# JEWELRY CARE

## Instructions

We know you love your jewelry and we want to help you take care of it. Here are our recommendations.

Place your jewelry on **AFTER** you have already put on your body oils, lotions, and perfumes. The chemicals in these products may assist in color changing. Also keep away from cleaning products, polishes, and perspiration.

Remove all pieces before bed and before engaging in any physical activities.

Keep your jewelry in a cool, dark and dry place such as a jewelry box (available here). Plastic ziplock bags (made of Mylar or polyethylene) are also good to use.

We would love to see how you wore your jewelry and accessories! If you choose to share your pictures on social media, please tag us with **#SoEcentric**.

Although we take pride in our high quality fashion jewelry, we do not warranty our merchandise. Color changing may occur regardless, but using these recommendations will definitely assist in when it may actually occur.

**Cleaning:** Rubbing a microfiber cloth gently on the jewelry is the best way to shine stones and clean metals, bringing the beauty back to your jewelry.
